

Triangles: sides and angles

Exit ticket

Name _____

- 1 AB is drawn.
Construct triangle
ABC with angle
 $A = 50^\circ$ and
 $AC = 3$ cm.

A _____ B
4 cm

- 2 To construct a triangle from a side and the two angles
at its ends, what do you draw after the base?

- 3 Can a triangle have angles of 110° and 75° at the two
ends of one side? Explain.
