

Name _____

A horizontal number line is shown, starting at 0 on the left and ending at 1.8 on the right. The line is divided into 10 equal segments by vertical tick marks. The first tick mark is labeled 0, and the last tick mark is labeled 1.8.

$$\begin{array}{r} \boxed{1.8} \div \boxed{0.6} \\ \downarrow \times 10 \quad \downarrow \times 10 \\ \boxed{18} \div \boxed{6} = \boxed{} \end{array}$$

A horizontal number line is shown, starting at 0 on the left and ending at 2 on the right. The line is divided into 10 equal segments by vertical tick marks. The first tick mark is at 0, and the last tick mark is at 2. There are 9 intermediate tick marks, creating 10 equal intervals.

$$\begin{array}{c} \boxed{2} \div \boxed{0.4} \\ \downarrow \times 10 \quad \downarrow \times 10 \\ \boxed{} \div \boxed{} = \boxed{} \end{array}$$

3 Work out $5.6 \div 0.7$.

The Maths Habit

Name _____

A horizontal number line is shown, starting at 0 and ending at 1.8. The line is divided into 10 equal intervals by vertical tick marks. The number 0 is written below the first tick mark, and the number 1.8 is written below the last tick mark.

$$\begin{array}{c} \boxed{1.8} \div \boxed{0.6} \\ \downarrow \times 10 \quad \downarrow \times 10 \\ \boxed{18} \div \boxed{6} = \boxed{} \end{array}$$

A horizontal number line is shown, starting at 0 on the left and ending at 2 on the right. The line is divided into 10 equal segments by 11 vertical tick marks, including the endpoints at 0 and 2.

$$\begin{array}{c} \boxed{2} \div \boxed{0.4} \\ \downarrow \times 10 \quad \downarrow \times 10 \\ \boxed{} \div \boxed{} = \boxed{} \end{array}$$

3 Work out $5.6 \div 0.7$.
