

Equations: the unknown on both sides

Exit ticket **ANSWERS** Name _____

1 Solve $4x + 5 = 3x + 11$

1 Take off the fewer x's

- 3x both sides $x + 5 = 11$

2 Get the x's on their own

Answer $x = 6$

2 Solve $5x + 3 = 2x + 24$

1 Take off the fewer x's

2 Get the x's on their own

3 Find one x

Answer $x = 7$

3 Solve $7x + 3 = 4x + 15$. Show your steps.

Answer $x = 4$
