

Graph transformations: where does the point go?

Exit ticket

Name _____

1 (4, 1) is on $y = f(x)$. Where is it on $y = f(x + 2)$?

2 (-3, 2) is on $y = f(x)$. Where is it on $y = -f(x)$?

3 (-1, 5) is on $y = f(x)$. On a new graph it is at (3, 5).
Write the equation of the new graph.
