

## The probability scale

Exit ticket Name \_\_\_\_\_

- 1 A spinner has 10 equal sections. 7 are blue.  
It is spun once. How likely is it to land on blue?

- 2 A fair dice is rolled.  
Mark with a cross the  
probability that it lands on  
an even number.

- 3 A bag holds 4 red counters and 1 blue counter.  
Kai says picking blue is an even chance because there  
are two colours. Is Kai right? Explain.
