

Equation of a tangent to a circle

Exit ticket

Name _____

- 1 P(3, -1) is on the circle $x^2 + y^2 = 10$. Find the gradient of the tangent at P.

- 2 Find the equation of the tangent to $x^2 + y^2 = 10$ at P(3, -1).

- 3 Fin says the tangent to $x^2 + y^2 = 20$ at (2, 4) has a gradient of 2. Is Fin right? Explain.
