

Odd One Out: Symmetry

ANSWERS

In each row, three shapes have the property and one does not. Circle the odd one out and write its letter in the box. Then unscramble your ten letters.

1	Exactly one line of symmetry	C  kite	L  isosceles trapezium	P  isosceles triangle	K  rectangle	K
2	No lines of symmetry	E  kite	O  scalene triangle	D  trapezium	L  parallelogram	E
3	Rotational symmetry of order 2	F  rectangle	L  isosceles trapezium	P  rhombus	K  parallelogram	L
4	More than two lines of symmetry	H  regular hexagon	U  equilateral triangle	A  rhombus	S  square	A
5	No rotational symmetry (order 1)	T  oval	B  kite	S  trapezium	R  isosceles triangle	T
6	Exactly two lines of symmetry	K  rectangle	B  square	W  oval	O  rhombus	B
7	As many lines of symmetry as its order of rotational symmetry	U  equilateral triangle	T  square	A  parallelogram	W  regular pentagon	A
8	Rotational symmetry of order 4 or more	R  regular pentagon	A  regular hexagon	L  equilateral triangle	E  square	L
9	At least one line of symmetry	W  regular pentagon	N  rectangle	A  isosceles trapezium	B  trapezium	B
10	An odd number of lines of symmetry	A  regular pentagon	P  equilateral triangle	S  regular hexagon	R  kite	S
