

Converting Fractions and Decimals *ramp up*

ANSWERS

a Write 0.7 as a fraction $\frac{7}{10}$ tenth	b Write 0.09 as a fraction $\frac{9}{100}$ hundredth	c Write 0.35 as a fraction in its simplest form $\frac{7}{20}$ hundredths, then simplest form	d Write 0.125 as a fraction in its simplest form $\frac{1}{8}$ thousandth
e Write $\frac{1}{5}$ as a decimal 0.2 a unit fraction to a decimal	f Write $\frac{9}{25}$ as a decimal 0.36 an equivalent fraction over 100	g Write $\frac{3}{8}$ as a decimal 0.375 a fraction to thousandths	h Write $\frac{7}{40}$ as a decimal 0.175 denominator not a factor of 100
i Write 3.5 as an improper fraction $\frac{7}{2}$ a decimal above 1 as a fraction	j Write $2\frac{3}{4}$ as a decimal 2.75 a mixed number to a decimal	k Write $\frac{13}{8}$ as a decimal 1.625 an improper fraction to a decimal	l Which is larger, $\frac{5}{8}$ or 0.6? $\frac{5}{8}$ comparing a fraction with a decimal
