

a a is 4 times b . Find $a : b$ $4 : 1$ a ratio from 'times as much'	b $a : b = 1 : 5$. b is how many times a ? 5 the multiplier from a 1 : n ratio	c $a : b = 1 : 5$. What fraction of b is a ? $\frac{1}{5}$ the multiplier the other way: a fraction	d $a : b = 2 : 5$. b is how many times a ? $\frac{5}{2}$ a multiplier that is not whole
e $a : b = 2 : 5$. What fraction of b is a ? $\frac{2}{5}$ one part as a fraction of the other	f $a = \frac{3}{5}b$. Find $a : b$ $3 : 5$ a fraction multiplier as a ratio	g $b = 1.5a$. Find $a : b$ $2 : 3$ a decimal multiplier as a ratio	h a is 40% of b . Find $a : b$ $2 : 5$ a percentage as a ratio
i $a = 2b$ and $b = 3c$. Find $a : b : c$ $6 : 3 : 1$ a chain of multipliers	j Find $a : b$ when $\frac{2}{3}$ of $a = \frac{1}{2}$ of b $3 : 4$ two equal fractions of a and b	k $a = 0.6b$. b is how many times a ? $\frac{5}{3}$ a decimal multiplier turned round	l $a : b = 3 : 4$. a grows by 50%. Find the new $a : b$ $9 : 8$ a new ratio after one part grows

The Maths Habit
