

Sequences

Calculator | 30 minutes | Total marks: 23

Name Class

- 1 (a) Write down the next two terms of this sequence.

5 8 11 14

Answer [1 mark]

- (b) Write down the rule for continuing the sequence in part (a).

Answer [1 mark]

- (c) Write down the next two terms of this sequence.

30 26 22 18

Answer [1 mark]

- 2 Write the two missing terms in this sequence.

2 6 14

[2 marks]

3 Here are the first three patterns in a sequence made from sticks.

Pattern 1

Pattern 2

Pattern 3

(a) Complete the table.

Pattern number	1	2	3	4	5
Number of sticks	3	5	7		

[2 marks]

(b) How many more sticks are needed each time?

Answer [1 mark]

(c) How many sticks are needed for Pattern 10?

Answer [2 marks]

4 Here is a function machine.

Input $\rightarrow$ $\times 2$ $\rightarrow$ $+ 1$ $\rightarrow$ Output

Complete the table.

Input	1	2	5	10
Output	3	5		

[2 marks]

5 The n th term of a sequence is $2n + 3$

(a) Work out the 1st term.

Answer [1 mark]

(b) Work out the 2nd term.

Answer [1 mark]

(c) Work out the 10th term.

Answer [1 mark]

6 Work out the n th term of each sequence.

(a) 3 6 9 12

Answer [1 mark]

(b) 4 7 10 13

Answer [2 marks]

7 (a) Write down the first five square numbers.

Answer [2 marks]

(b) In this sequence, each term is the sum of the two terms before it.

1 1 2 3 5

Write the next term in the box.

[1 mark]

8 Here is a sequence.

2 4 8 16

(a) Write down the next term.

Answer [1 mark]

(b) Write down the rule for continuing the sequence.

Answer [1 mark]

Question	Topic	RAG
1	I can continue a sequence and give its rule	
2	I can find missing terms	
3	I can continue a pattern and find a later pattern	
4	I can use a function machine	
5	I can use an nth term	
6	I can find the nth term of a sequence	
7	I know square numbers and Fibonacci type sequences	
8	I can continue a sequence that doubles
